EDUCATION

Washington University in St. Louis

Bachelor of Science in Computer Science & Mathematics

May, 2028

St. Louis, MO

- GPA: 3.94/4.0
- Activities: Teaching assistant for CSE332 and CSE132, Phi Gamma Nu Professional Fraternity (prev. Academic Chair), Private Tutor (mentored 10+ students), WU Google Student Developer Club, Rock Climbing Team
- Relevant Coursework: Matrix Algebra, Systems Software, Data Structures, Object-Oriented C++ Development

TECHNICAL SKILLS

Languages: Python, Java, C/C++, JavaScript, TypeScript, Go, PHP, Dart, SQL, HTML/CSS

Frameworks & Libraries: React.js, Redux, Node.js, Express.js, FastAPI, Flask, Django, Spring Boot, Electron

Databases & APIs: PostgreSQL, MySQL, MongoDB, Redis, ElastiCache, Prisma, Firebase, REST, GraphQL

Cloud & DevOps: AWS (EKS, ECR), Azure DevOps, Google Cloud, Kubernetes, Docker, Pulumi (IaC), Datadog

Developer Tools: Git/GitHub, Jenkins, Linux, Bash, Postman, Jira, Linear

EXPERIENCE

Rivian

May. 2026 – present

Software Engineer Intern

Irvine, CA

- Built agent-orchestrating CI that offloads engineering work to Claude. A nightly pipeline autonomously migrates the codebase toward a target architecture using **3 parallel agent workers**, each claiming a distinct backlog item via its CI-NODE-INDEX slot with open-MR dedup, then gating output through 5 automated checks.
- Built an **event-driven notification system** on a durable job queue, fanning lifecycle events out across 3 channels (email/SES, Slack, in-app) to multiple recipient classes; delivered 25+ merge requests and 11+ event types with per-recipient idempotency keys (event:id:channel:recipient).
- **Shipped 150+ merge requests** spanning the entire stack of an internal service-management platform with React/TypeScript (admin + employee portal), a Fastify/Drizzle/Postgres API, and GitLab CI.

Stoke Space

Jan. 2026 – Apr. 2026

Software Engineer Intern

Seattle, WA

- Implemented caching with AWS ElastiCache to optimize expensive tree-based (Lateral JOIN) Prisma queries in Stoke's Boltline GraphQL services, which cut latency from **54ms down to 14ms** and saved **7M DB calls** a week.
- Prevented thundering herd on Redis cache expiry with TTL jitter, X-fetch probabilistic recomputation, and round-robin pooling.
- Operated in a production environment and **shipped 82 PRs** (e.g. worked on activity logs, SQL migrations, CICD deflaking, etc), making use of tools such as Datadog, Pulumi IaC, AWS, Redis Insight, and more.
- Developed an additional internal tool (BoltSync) to monitor PR status on CICD using **Electron and GitHub CLI**

Fresenius Medical Care, Inc

May 2025 – Aug. 2025

Software Engineer Intern

Lexington, MA

- Leveraged the CrowdStrike API (FalconPy) to create a Flask API in coordination with a Go CLI interface to automate KPI metrics, leading to an improvement in **operational efficiency by 72%** for data leaders/owners.
- Contributed to Spring Boot Framework by developing JUnit tests and developing endpoints for Kafka/MongoDB
- Deployed LiteLLM open source on **Azure ADO** with **AWS ECR, EKS, Aurora DB** to monitor LLM spending
- Spearheaded ServiceNow MCP server development with internal tools to **optimize ticket reviews by 43%**.

PROJECTS

BEM Tutoring & Consulting 🦋 | React + Redux, Node, Supabase, Typescript, Express, and Stripe

2025 - present

- Designed, built, and sold a management system to automate billing cycles to a boutique tutoring company
- Architected a scalable solution to account for a team of 15 workers and 150+ students and parents

WPI-Roadmap 🦋 | React + Redux, Express, Firebase, JavaScript, Ant-D

2024

- Led front-end development (React + Ant-D) of academic advising app and integrated with FirebaseAuth
- 2024 GoatHacks (HackWPI) Winning Team (1st/50+ teams), now used by 50+ users

Digital Sign-in/out System 🦋 | React + Redux, Express, Firebase, Azure, MySQL, Tailwind

2023

- Led hardware and database integration (team of 4) for school sign-in system with MySQL, Python, and React
- First-ever student-created app used by 100+ students at WPI in collaboration with WPI InfoSec/NetOps team
